## ***Kneadable Eraser***

Kneadable erasers can be shaped into anything and are designed to erase pencil or charcoal markings (for an artistic person) on a page.

## ***Easy to Mold***

Pliable putty-like eraser that can be molded into any shape. The seller (Student Supply Company) responding to a question about the erasers said, "The longevity would of course depend on how and how often the eraser is used. Some even use it as modeling clay." Another customer review said, "Didn't think they'd be a good quality at first, but work very well and don't leave the respective color on paper."

## ***Adds More Fun to Gaming for a Cheaper Price***

I've actually used this to make models dragons for a Dungeons and Dragons game before. Because they're so malleable you can make any shape you need. It's much cheaper than buying the premade models for D&D and you can whatever model you want. They are also less messy than play dough because they don't leave a sticky residue on your hands. There is a somewhat of a residue but it doesn't come close to the play dough feel.
